to me

Dear Badaruddin,

The submission items for your manuscript "ANALYTICAL AND NUMERICAL MODEL OF SALTWATER INTRUSION IN JENEPONTO REGENCY SOUTH SULAWESI PROVINCE INDONESIA" have been successfully uploaded. Please now log in to Editorial Manager to view and approve the pdf of the submission, and to accept the IWA Publishing Ethics Statement. Once this has been done, your submission will be sent to an Associate Editor for review.

This is an automatic e-mail sent when the PDF of your submission is built. If you have uploaded the submission items yourself, you may have already viewed and approved your PDF while on-line, in which case you do not need to return to view and approve the submission. If, however, your submission has been uploaded by the Editorial Office on your behalf, you will now need to log in to complete the submission process.

Please log in to the journal using the following information:

URL: <https://www.editorialmanager.com/wpt/>

Username: sugi-poli

Password reset link: <https://www.editorialmanager.com/wpt/l.asp?i=790043&l=ION7PZ6S>

Please view the submission before approving it to be certain that your submission remains free of any errors. If there are any errors, you can edit the submission by clicking on the Edit Submission Action Link and selecting the relevant submission step from the menu on the right of the screen. If you require any assistance with this, please do not hesitate to contact me.

Please note that it is now mandatory to include the institutional email addresses of all co-authors in the

submission details. Your paper will not be sent to an Editor until all of these email addresses have been added.

Thank you for your time and patience.

With best wishes,

The Editors

Water Practice and Technology

Article title: 'ANALYTICAL AND NUMERICAL MODEL OF SALTWATER INTRUSION IN JENEPONTO REGENCY SOUTH SULAWESI PROVINCE INDONESIA'

Reference No: WPT-D-22-00066

Dear Sugiarto Badaruddin,

Following the peer review of your initial submission, I am pleased to inform you that your article 'ANALYTICAL AND NUMERICAL MODEL OF SALTWATER INTRUSION IN JENEPONTO REGENCY SOUTH SULAWESI PROVINCE INDONESIA' may still be selected for publication in *Water Practice and Technology* if you can revise it to the Editor's satisfaction, taking into consideration the reviewer comments as detailed at the end of this message.

If the reviewers or Editor have uploaded any extra files for your reference, you can view them by logging in to Editorial Manager, opening the Submissions Needing Revision folder and clicking on 'View Reviewer Attachments'.

For a revised version we require 3 separate items:

1. Revision Notes explaining how and where (citing line number) each point of the Editor's/Reviewers' comments has been addressed. Should you disagree with any part of the reviews, please explain why.
2. A version of the revised manuscript showing the new/changed text using track changes or highlighting. Please note that this should be uploaded as submission item "Manuscript (revision

changes marked)". To facilitate further review, add line numbers in the text.

3. A clean version of the revised manuscript, also with line numbers. Please note that this should be uploaded as submission item "Manuscript".

You must also make sure that you have included the co-author institutional email addresses in the submission information, this is so we can verify all co-authors. We will not be able to proceed with the next stage of peer review unless all co-authors have confirmed their involvement with the paper.

Please ensure that your revised manuscript also contains the following:

- **Graphical Abstract:** This should offer readers an at-a-glance visualisation of your paper via a single, concise image.
- **Data Availability Statement:** Please ensure that you have selected the correct Data Availability Statement option in the 'Additional Information' section of your submission.
- **Conflict of Interest Statement:** Please ensure that you have included a full Conflict of Interest Statement to certify that the authors are not affiliated with or involved with any organisation or entity with any financial interest or non-financial interest in the subject matter or materials discussed in this paper. This statement should be included in the 'Additional Information' section of your submission. Please address queries about Conflicts of Interest to the journal office: editorial@iwap.co.uk.

To submit the revised version of your article, go to <https://www.editorialmanager.com/wpt/> then log in as an Author using the following username:

sugi-poli

and click on the Submissions Needing Revision folder. You will find your submission record there.

Your revision is due within 21 days of this message (16 May 2022); if you do not submit your revision by this date, we will consider your paper withdrawn from the review process.

This email has only been sent to 1 author; please pass on this message to your co-authors.

Yours sincerely,

Natasha Healy
Journals Manager
Water Practice and Technology

Reviewers' comments:

Reviewer #1: An interesting manuscript to review with regards to the subject of the investigations. The following are some of the comments that might further enhanced the manuscript:

1. The Keywords that have been selected should be replaced with other keywords of more relevant and impact to this investigation.
2. In the Introduction section, more recent references on this subject should be included in which the rebuttal of the results of the study should be used in the discussion section, where relevant.
3. The origin of Eqn. 1 is unfounded, unless purely derived based on Fig. 2 which is to be determined.
4. The relevant equation(s) related to the Numerical Modelling should be included in Section 3.3. The method of obtaining the results should be described in the relevant section. All the associated software used in this study should be included at the relevant juncture to further enhanced the depth and quality of the manuscript.
5. In Section 3.1, since the financial constraints hindered the acquiring of the stated data, have other secondary or relevant data of similar nature elsewhere being referred instead of simplifying the soil heterogeneity of the aquifer?
6. Results of the discussion with regards to analytical method is very limited in its present form. Counter checks work should have been made from other reported work of similar studies to comment on the results obtained from this method. As it is, the discussion is too limited and unsupported to have much impact to the overall investigations.
7. As to the results of the numerical studies, the discussions lack the comparison of results with other similar studies elsewhere (around the globe) that would enhanced the results obtained.
8. To further enhanced the relevant references by using the relevant and current ones.

Reviewer #3: The paper needs major revisions:

- (1) The following paragraph needs references and more robust clarifications:
Over the last decade, there has been rapid population growth worldwide, including in Indonesia, particularly in Jenepono Regency in South Sulawesi Province, which has resulted in massive groundwater exploitation. This phenomenon has harmed groundwater quantity and quality, including decreased groundwater levels, increased fluctuations, and decreased groundwater quality, as well as SWI in several regions. As a result, a concerted effort on the government, the public, and the private sectors are required to mitigate these negative consequences
- (2) Innovation and motivations need to be expanded in the introduction.
- (3) The present results need to be compared with literature review
- (4) Increase number of literature review
- (5) The performance of the present research should be statistically done by using MAE and RMSE.
- (6) The present research should be carried out for other boundary conditions.

ANALYTICAL AND NUMERICAL MODEL OF SALTWATER INTRUSION IN
JENEPONTO REGENCY SOUTH SULAWESI PROVINCE INDONESIA
Water Practice and Technology

Dear Badaruddin,

Thank you for submitting your revised paper back to Water Practice and Technology. Please can you now ensure that all of your co-authors have verified that they worked on this paper. Your listed co-authors have been sent an automated message using the email addresses that you included during the submission process which contains a link for them to click on to confirm that they are a co-author.

Please log in <https://www.editorialmanager.com/wpt/> to ensure that they have completed their verification. You can find your paper via the Author Main Menu in the "Revisions Being Processed Folder". From there please click on the Action Link: "Author Status", a new screen will open up detailing which authors have verified and whether any have yet to respond.

1. If all co-authors have completed the co-author verification, then please then go to the "Current Task folder" and confirm that all authors have confirmed.
2. If any co-authors have not yet completed the co-author verification, please contact them now to ask them to do so. If they did not receive our initial message reply directly to this email so that we can resend the link to them. When they have received and responded to the verification request, please follow step 1 above.

Please ensure all co-authors have verified their co-authorship now to avoid publication delays should your paper be accepted.

With kind regards

Natasha Healy

Title: "ANALYTICAL AND NUMERICAL MODEL OF SALTWATER INTRUSION IN JENEPONTO REGENCY SOUTH SULAWESI PROVINCE INDONESIA"

Dear Badaruddin,

I am pleased to inform you that I have received your accepted paper into the Water Practice and Technology production system.

Before I can begin the production process I need you to confirm the type of Open Access publication you would prefer. Please could you log in to our Editorial Manager system, go to your papers in production queue to carry out the necessary tasks.

You can see more information about Open Access Licence types [here](#).

PLEASE NOTE THAT YOUR PAPER CANNOT BE PUBLISHED UNTIL YOU HAVE COMPLETED THE TASK.

Once you have completed the task, the accepted version of your paper will be typeset, at which point you will receive your page proofs and this version will be made available on our website with a citeable DOI.

Please check your proofs carefully. There may be some queries from the copy editor which you will need to respond to. These will be placed at the very end of the document. Please do look for these and provide responses for us. We will then make these changes in the typeset paper,

publish your corrected proof online and assign your article to an issue.

The electronic version of your final published paper will be sent to you via e-mail upon publication. If you would prefer to receive paper offprints, please download an Offprint Order form here: <http://iwaponline.com/sites/default/files/Offprint.pdf>

Open Access for Water Practice and Technology is made possible through a [Subscribe to Open](#) (S2O) model. Each year, institutions, organisations and individuals contribute to our annual Open Access goal by 'subscribing' to individual journals or to the entire journal package. These S2O subscriptions allow us to waive author fees (APCs) in these journals. If you opted to contribute the cost of an APC to the S2O model, you can do so by clicking here:

[Donate to Subscribe to Open](#)

As an author in an IWA Publishing journal we are pleased to offer you a 25% discount on IWA Publishing books and reports. Please see our online books catalogue at <http://www.iwapublishing.com>. Order via our distributors, Turpin Distribution Ltd (iwap@turpin-distribution.com).

To find out prior to publication when your paper will be appearing in the journal, you are advised to [sign up for Content Alerts](#) via our website. This is a pre-publication alerting service, available free of charge and delivered via email.

Please contact me if you have any questions regarding the journal.

Yours sincerely

Journal Production Editor

to me

Dear Badaruddin,

Your paper ANALYTICAL AND NUMERICAL MODEL OF SALTWATER INTRUSION IN JENEPONTO REGENCY SOUTH SULAWESI PROVINCE INDONESIA, ref: WPT-D-22-00066R1 was recently accepted by Water Practice and Technology.

We are now processing your paper for publication, and need you to log in using this link: [Production Task Assignment](#)

This will take you to your Current Task Assignment where you should use the action link "[Submit Task](#)" to provide the following information:

1) Select an Open Access Licence Agreement. More information about Licence Agreements can be found [here](#). Articles published in this journal will be published Open Access free of charge under a CC BY or CC BY NC ND licence.

Please note: Water Practice and Technology is an OPEN ACCESS journal thanks to the support of universities, institutions and individuals who have contributed towards our annual [Subscribe to Open](#) goal.

PLEASE NOTE THAT YOUR PAPER CANNOT BE PUBLISHED UNTIL THIS STAGE HAS BEEN COMPLETED.

2) If you provided a PDF file of your paper during the peer review process, you will now need to upload a Word document of the text, tables and the original figure files. If your paper is in LaTeX format we will need the LaTeX files as well as the PDF.

3) Please ensure that the Co-Author Verification Task has been completed, if not already in order to prevent delays to the production process.

You must complete this task within two days in order for the production process to proceed. Please complete the task in the system, there is no need to email files to the Production Team. Please contact us directly only if you are having a problem with using the system.

Kind regards,
Water Practice and Technology
IWA Publishing
