We confirm receiving of the paper - registered as PE3657.
Please refer always (!) to this number in correspondence.

Please read information about printing costs on our www page red.pe.org.pl.

The most important point 6 of submission form is not fulfilled.

Best regards

Manuscript reference: PE 3657

Author: **Ahmad Rizal SULTAN, Mohd Wazir bin MUSTAFA**

Title: **An Overview of Stator Winding Ground Fault Protection Schemes**

Please indicate mark from 0 to 10.

1. Does the paper represent an original contribution to the field of interest of electrical engineering: 5
2. Is the paper of good scientific quality and free from obvious errors: 5
3. Is the paper clear, concise and well organized: 5
4. Do the authors place the paper in proper context by citing previous relevant papers: 8
5. Does the abstract adequately summarize the work and the main conclusions: 8
6. Are figures and tables clear and relevant and captions adequate: 7
7. Is the paper written in correct English: 3
8. Are the conclusions supported by experimental evidence, computed results or prior publications: yes
9. To what extent is the material in the paper likely to be of interest by other researcher in the field
 - a. Very Much:
 - b. Much:
 - c. Average: X
 - d. Little:
 - e. Never:
10. Recommendation
 - a. Accept as it is
 - b. Accept with minor changes
 - c. Accept subject to required revision: X
 - d. Do not publish

Please put additional remarks on the next page. Comments are strongly encouraged.

An article is written horrible English.

Almost in every sentence appear grammatical and stylistic errors.

Author often use unsuitable words and phrases.

For example, what do mean these sentences?

Some suggestion's detection was proposed that can make the stator winding ground fault more accurate.

For the main fault-line near neutrality, the resulting voltage trips currently available for small mistakes.

Article demands solid lingual correction.
