17-Nov-2015

Dear Mrs. Aryani:

Your manuscript entitled "On Identification of Hammerstein and Wiener model with application to virtualized software system" which you submitted to International Journal of Systems Science, has been reviewed. Reviewer(s) comments are included at the end of this communication.

You will see that although the referees find some merit in the paper it is required that substantial revisions be done before we can consider it further. Nevertheless, we do hope that you will be able to undertake the additional work on the paper and look forward to receiving a revised manuscript in due course.

When you revise your manuscript please highlight the changes you make in the manuscript by using the track changes mode in MS Word or by using bold or coloured text.

If there are very many changes, it may be convenient for you to ALSO upload an unmarked version of your revised manuscript.

To submit the revision, log into <https://mc.manuscriptcentral.com/tsys> and enter your Author Centre, where you will find your manuscript title listed under "Manuscripts with Decisions." Under "Actions," click on "Create a Revision." Your manuscript number has been appended to denote a revision.

You MUST provide a response to the comments made by the reviewer(s) Please enter your response in the space provided. You can use this space to document any changes you made to the original manuscript. Please be as specific as possible in your response to the reviewer(s). Alternatively, you may prefer to upload a Responses to Reviewers document as a Supplemental File.

**IMPORTANT:** Your original files are available to you when you upload your revised manuscript. Please delete any redundant files before completing the submission.

Because we are trying to facilitate timely publication of manuscripts submitted to International Journal of Systems Science, your revised manuscript should be uploaded as soon as possible. If it is not possible for you to submit your revision within 60 days, please contact [ijss@sheffield.ac.uk](mailto:ijss@sheffield.ac.uk). We may have to consider your paper as a new submission if it is not received in a reasonable amount of time.

Once again, thank you for submitting your manuscript to International Journal of Systems Science and I look forward to receiving your revision.

Sincerely,  
Professor Visakan Kadiramanathan  
Deputy Editor-in-Chief  
International Journal of Systems Science

Reviewer(s)' Comments to Author:

Associate Editor  
Comments to the Author :

The reviewers have made some critical comments on the paper. These include the justification of the proposed model for the considered practical problem, whether an alternative modeling could produce a better result, and the conditions on the excitation signals needed for implementing the proposed method. Also the presentation of the paper also needs some improvements. These comments should all be properly addressed in the revised paper.
