Reviewer Responses:

A Similarity Check test indicates that your paper has a borderline similarity index, i.e. a significant percentage of text present in your paper originates from papers already published. For this reason you must change the sentences of the following parts of the paper:

- Section II.3
- Section II.4

For any questions don't hesitate to contact us by means of the on-line submission system (Notify Editor button).

First of all, we apologize for the lengthy review period.

Manuscript ID 23635 entitled "The Impact of Stirring Model on Aluminum Alloys ADC12's Microstructure and Mechanical Properties" which you submitted to our Journal "International Review of Mechanical Engineering (IREME)" has been reviewed. The comments of the reviewer(s) are included at the bottom of this email.

The reviewer(s) have recommended a MAJOR REVISION.
This is an opportunity for you to respond to their major concerns and to incorporate improvements in the paper according to their suggestions. It is also an opportunity for you to add new results.
We normally only permit a major revision before an accept or reject decision is made. So please take the concerns of the reviewers seriously.

Therefore, I invite you to respond to the reviewer(s)' comments and revise your manuscript within two weeks from the date of this email.

If it is not possible for you to submit your revision in a reasonable amount of time, we may have to consider your paper as a new submission.
You should revise your manuscript using a word processing program and save it on your computer. Please also highlight the changes to your manuscript within the document by using the colored text in red.
Once the revised manuscript is prepared, you can upload it and submit it through your on-line submission system.
In order to expedite the processing of the revised manuscript, please be as specific as possible in your response to the reviewer(s).

Once again, thank you for submitting your manuscript to our Journal and I look forward to receiving your revision.

Sincerely,
Dr. Ethirajan Rathakrishnan, Editor-in-Chief of International Review of Mechanical Engineering (IREME)
erath@iitk.ac.in

Reviewer Responses:

After a complete review of the article, we strongly suggest the editor and author to undergo a major revision. A revised version after evaluation can be considered for publication.

- Below the summary of the main remarks:
- English grammar and style should be carefully revised.
 - At the end of the Introduction add a paragraph on how the rest of the paper is organized and developed, typically a summary on the rest.
 - At the beginning of the paper, before the Introduction section, a Nomenclature section, not numbered, should be added with a list, in alphabetic order, of all the used distinct symbols/acronyms and their meaning.
 - References are partially outdated, more recent literature review from journals' papers published after 2020 should be suitable. It is kindly suggested to the authors to visit our wide database of titles where they could search for references in this time frame, at the page <https://www.praiseworthyprize.org/jsm/index.php?journal=index&page=search>
 - The review section should be more expanded based on the proposed references list.
 - The conclusion is weak. In the Conclusions, the authors should state the scope and the aims of this investigation, along with important research directions on this issue.
 - In the Conclusion paragraph the Authors could propose further improvements to be set for their proposal for a future development.
 - Letters (a), (b), ... with relative description for the subfigures in Figs. 2, 10 should be outside the figures, in text format.
 - Some figures quality should be improved (see figures 8,9).

For any questions don't hesitate to contact us.

Reviewer Responses:

- English is comprehensible but needs correction of grammatical errors and style. We would like to suggest using our service "English Language Editing". More information can be found to http://www.praiseworthyprize.com/english_service.htm

- At the end of the Introduction add a paragraph on how the rest of the paper is organized and developed, typically a summary on the rest.

For any questions don't hesitate to contact us.
