Dear dr. Rusdi Rusdi Nur,

First of all, we apologize for the very lengthy review period.

Manuscript ID 23973 entitled "Optimizing the Punch Parameters for V-Bending Stainless Steel Using Application Response Surface Methodology" which you submitted to our Journal "International Review of Mechanical Engineering (IREME)" has been reviewed. The comments of the reviewer(s) are included at the bottom of this email.

The reviewer(s) have recommended a MAJOR REVISION. This is an opportunity for you to respond to their major concerns and to incorporate improvements in the paper according to their suggestions. It is also an opportunity for you to add new results. We normally only permit one major revision before an accept or reject decision is made. So please take the concerns of the reviewers seriously.

Therefore, I invite you to respond to the reviewer(s)' comments and revise your manuscript within two weeks from the date of this email.

If it is not possible for you to submit your revision in a reasonable amount of time, we may have to consider your paper as a new submission. You should revise your manuscript using a word processing program and save it on your computer. Please also highlight the changes to your manuscript within the document by using the colored text in red. Once the revised manuscript is prepared, you can upload it and submit it through your on-line submission system. In order to expedite the processing of the revised manuscript, please be as specific as possible in your response to the reviewer(s).

Once again, thank you for submitting your manuscript to our Journal and I look forward to receiving your revision.

Sincerely,
Dr. Ethirajan Rathakrishnan, Editor-in-Chief of International Review of Mechanical Engineering (IREME)
erath@iitk.ac.in

Reviewer Responses:

After a complete review of the article, we strongly suggest the editor and author to undergo a major revision. A revised version after evaluation can be considered for publication.

Below the summary of the main remarks:

- The title of the manuscript could be changed as below:
"Optimizing the Punch Parameters for V-Bending Stainless Steel Using Response Surface Methodology Approach".
- At the beginning of the paper, before the Introduction section, a Nomenclature section, not numbered, should be added with a list, in alphabetic order, of all the used distinct symbols/acronyms and their meaning.
- The conclusion is weak. In the Conclusions, the authors should state the scope and the aims of this investigation, along with important research directions on this issue.

- At the end of the Introduction add a paragraph on how the rest of the paper is organized and developed, typically a summary on the rest.
- Some figures quality should be improved (see figures 1-4 and 7-11).
- The reference list should be enhanced. More references to be from 2021-to date are expected. It is kindly suggested to the authors to visit our wide database of titles where they could search for references in this time frame, at the page <https://www.praiseworthyprize.org/jsm/index.php?journal=index&page=search>
- The review section should be more expanded based on the proposed references list.
- English grammar and style should be carefully revised.

For any questions don't hesitate to contact us.
